

Education System and Its Future in America Conference

Session 11: Addressing Mental Health in Schools

This session will address the critical issue of mental health in schools. Participants will learn about the importance of supporting student mental health and effective strategies for creating a mentally healthy school environment.

Presentation 1: Recognizing and Responding to Student Mental Health Needs

This presentation will provide an overview of common mental health issues faced by students and how educators can recognize and respond to these needs. Strategies for creating a supportive and inclusive school environment will be shared.

Presenter: Dr. Megan Thompson

Presentation 2: Implementing School-Based Mental Health Programs

This presentation will focus on the implementation of school-based mental health programs. Examples of successful programs will be shared, along with practical tips for integrating mental health support into the school setting.

Presenter: Ms. Laura Evans
